Hi John,

## Ex. 5 Deliberative Process (DP)

I've corrected the powerpoint with the updated figure and have attached it. So sorry—very glad you caught it! There's definitely value in a second set of eyes.

Thanks,

Mary

Hi John,

I've tried checking and re-plotting the data a few times, and the  $r^2$  values seem to be correct... I'm not sure why the difference would be so large.

Hi John,

Good catch! That is surprising... I'll look into it to make sure I haven't overlooked an error.

Thanks,

Mary

Hi John,

I've attached a powerpoint with that figure and essentially the same one with compound mass instead. Please let me know if you need anything else, or if you'd like me to tweak the figures. Note: they've changed a bit since I last sent them to you, but the conclusions remain the same.

Thanks,

Mary

Hi Mary, Marina and Eric,

I have a briefing scheduled with Jennifer O-Z and Tim Watkins next week on the NJ polyether investigation. This is a good opportunity to wrap it up with where we are going to highlight your work. Toward this end, could you each send me an image this week when time:
